

## ALCOLEC® DHR

**DESCRIPTION:** ALCOLEC DHR is a powdered, water dispersible soybean lecithin. The product has significantly enhanced surface-active properties, making it a versatile wetting agent and oil-in-water emulsifier. Also, ALCOLEC DHR is specially processed for maximum heat resistance, or non-darkening, in high temperature release applications. Because ALCOLEC DHR is a free flowing powder, it allows for easy and precise measurement into many food formulations.

### SPECIFICATIONS:

Physical State	Powder
Acetone Insolubles	97% Minimum
Hexane Insolubles	0.3 % Minimum
Moisture	1.5% Maximum
Acid Value	36% Maximum
Color (Gardner Undiluted)	Light Tan or Yellow

**LABELING:** ALCOLEC DHR is labeled as follows: "Soy Lecithin". ALCOLEC DHR is generally recognized as safe (GRAS). ALCOLEC DHR is Kosher approved.

**PACKAGING:** ALCOLEC DHR is packaged in a new kraft box holding 20 kgs. (44.09 lbs.) net weight in a heat sealed polybag.

**STORAGE:** Storage temperature should not exceed 75°F (25°C). ALCOLEC DHR is a hygroscopic material. Store in dry, sealed, original container. Typical shelf life is approximately 18 months in the original, unopened container.
