

ALCOLEC® HR

DESCRIPTION: ALCOLEC HR is a yellow, food grade, fluid lecithin used for release and emulsification. Used as a release agent ALCOLEC HR is resistant to high temperature conditions therefore maintaining its yellow color. As an emulsifier ALCOLEC HR is more water dispersible than standard grade lecithins.

SPECIFICATIONS:

Physical State	Fluid
Acetone Insolubles	53 – 56%
Hexane Insolubles	0.02% Maximum
Moisture	0.8% Maximum
Acid Value	15 - 25
Color (Gardner Undiluted)	12 Minimum
Viscosity	3,000 Maximum

LABELING: Lecithin is generally recognized as safe (GRAS) under 21 CFR 184.1400. Labeling of ALCOLEC HR should be "SOY LECITHIN". ALCOLEC HR is Kosher approved.

PACKAGING: Standard packaging is in 55 gallon, steel, open head drums with a net weight of 420 pounds.

STORAGE: Storage temperature should be between 60° and 90° F (16° - 32° C). Typical shelf life is approximately 18 months in original unopened container.
