

ALCOLEC XTRA-A LECITHIN

DESCRIPTION: ALCOLEC XTRA-A is a premium Soybean Lecithin containing a higher percentage of phospholipids than ordinary fluid Lecithin. Its high concentration of Phospholipids (minimum 66% A.I.) versus ordinary fluid Lecithin (minimum 62% A.I.) improves its functionality as a water in oil emulsifier.

SPECIFICATIONS:

Physical State	Fluid
Acetone Insolubles	66% Minimum
Hexane Insolubles	0.1% Maximum
Moisture	0.8% Maximum
Oil Content	Less Than 34%
Acid Value	25 Maximum
Color (Gardner Undiluted)	17 Maximum

CHARACTERISTICS/USES: ALCOLEC XTRA-A is an amber colored high viscosity fluid with a significantly lower fatty acid value than found in commercial Lecithins.

Major Functionalities Are:

- Excellent Water in Oil Emulsifier - HLB of 2.
- More suitable for use with oil or fat products where low free fatty acid is important.

LABELING: Lecithin is generally recognized as safe (GRAS) under 21 CFR 184.1400. Labeling of ALCOLEC XTRA-A should be "SOY LECITHIN". ALCOLEC XTRA-A is Kosher approved.

PACKAGING: Standard packaging is in 55 gallon, steel, open head drums with a net weight of 450 pounds.

STORAGE: Storage temperature should be between 60° to 90° F (16° - 32° C) Typical shelf life is approximately 18 months in original unopened container.
